DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-11 in the reply filed on May 15, 2006 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

On line 7, there is no antecedent for "said input signal".

In claim 1, the tuning module receives the transmit signal (19 in Fig. 1) and filtered signal (25 in Fig. 1). However, the specification, at paragraph 0027, states that the tuning module compares the filtered signal (25) with the receiver input signal (21). Therefore, the claim is vague and indefinite whether the tuning module compares the filtered signal with the "transmit signal 19" or the "receiver input signal 21". There appears to be a discrepancy between the claims and the specification and drawing.

Allowable Subject Matter

4. Claims 1-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art of record is the patent to Lyon et al. Specifically, Lyon et al discloses a pulse-echo ranging system that includes a transmitter (18), a transducer (12), a receiver (20), a tunable filter (30) and a controller (14).

Per independent claim 1, Lyon et al does not disclose a tuning module, as claimed.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
